## Ethnicity and the Colonial State

Alexander Keese 2015-12-04 Ethnicity and the Colonial State compares the choices of community leaders in three different West African groups (Wolof, Temne, and Ewe), with regard to "selling" their identifications to the colonial rulers. The book thereby addresses ethnicity as a factor in global history.

*Africans* John Iliffe 2007-08-13 In a vast and all-embracing study of Africa, from the origins of mankind to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their

survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen. Africans: The History of a Continent is thus a single story binding living Africans to their earliest human ancestors.

*Power and Landscape in Atlantic West*

*Africa* J. Cameron Monroe 2012-02-13 "This volume applies insights drawn from the theories and methods of landscape archaeology to contribute to our understanding of the nature of West African societies in the Atlantic Era (17th-19th Centuries AD). The authors adopt a broad set of methods and approaches to tackle how the nature and structures of African political and social relations changed across regions in this period. This is only the second volume in a decade to focus on the archeology of this period in West Africa, and the first volume in sub-Saharan Africanist archeology to be focused in the recent past in one sub-region of the continent from a coherent methodological and theoretical standpoint"--Provided by publisher.

**The Kingdom of Waalo** Boubacar Barry 2017-10-26 Situated along the Senegal River, the Kingdom of Waalo was the smallest of the Wolof states of Senegal, but it illustrates the broader consequences of a shift from trans-Saharan to trans-Atlantic commerce during a time of competing European, Muslim, and indigenous African forces. From the establishment of a French trading post in 1659 to the early nineteenth century, the history of Waalo was closely tied to French interests in St. Louis, popular revolutionary Islamic movements, and internal rivalries between competing royal families and provincial leaders. Stimulating Waalo's socio-political changes were the devastations and fluctuations of the Atlantic slave trade, as well as the Muslim attack

on its aristocracy. Torn by internal divisions, devastated by French and Berber incursions, Waalo's institutions and its economy declined. Residents of Waalo sought their own solutions only for external agents to ruin their efforts. By the nineteenth century, the French attempted to establish a plantation economy in Waalo, culminating in their military control of the state and the Senegal valley. This newly translated study is a vital tool in our understanding of Senegal's history, its place in the era of trans-Saharan and trans-Atlantic commerce, and its development into the present. The book should be of value to African studies scholars, anthropologists, and historians of Africa, colonialism, empire, and post-colonialism.

The Rise of the Trans-Atlantic Slave Trade in Western Africa, 1300–1589

Toby Green 2011-10-10 The region between the river Senegal and Sierra Leone saw the first trans-Atlantic slave trade in the sixteenth century. Drawing on many new sources, Toby Green challenges current quantitative approaches to the history of the slave trade. New data on slave origins can show how and why Western African societies responded to Atlantic pressures. Green argues that answering these questions requires a cultural framework and uses the idea of creolization - the formation of mixed cultural communities in the era of plantation societies - to argue that preceding social patterns in both Africa and Europe were crucial. Major impacts of the sixteenth-century slave trade included political fragmentation, changes in identity and the re-organization of ritual and social patterns. The book shows which peoples were enslaved, why they were vulnerable and the consequences in Africa and beyond.

### **Indian Cotton Textiles in West Africa**

Kazuo Kobayashi 2019-06-10 This book focuses on the significant role of West African consumers in the development of the global economy. It explores their demand for Indian cotton textiles and how their consumption shaped patterns of global trade, influencing economies and businesses from Western Europe to South Asia. In turn, the book examines how cotton textile production in southern India responded to this demand. Through this perspective of a south-south economic history, the study foregrounds African agency and considers the lasting impact on production and exports in South Asia. It also considers how European commercial and imperial expansion provided a complex web of networks, linking West African consumers and Indian weavers. Crucially, it demonstrates the emergence of the modern global economy.

### **West African Slavery and Atlantic Commerce**

James F. Searing 1993-07-22 West African societies were transformed by the slave trade, even in regions where few slaves were exported. While many books have been written on the import and export trade and on warrior predation, Dr Searing's concern is with the effects of the Atlantic slave trade on the societies of the Senegal river valley in the eighteenth century. He shows that the growth of the Atlantic trade stimulated the development of slavery within West Africa. Slaves worked as seamen in the river and coasting trades, produced surplus grain to feed slaves in transit, and sometimes came to hold pivotal positions in the political structure of the coastal kingdoms of Senegambia. This local slave system had far-reaching consequences, leading to religious protest and slave rebellions. The changes in agricultural production fostered an ecological crisis.

**Gender and International Migration** Katharine M. Donato  
2015-03-30 In 2006, the United Nations reported on the "feminization" of migration,

noting that the number of female migrants had doubled over the last five decades. Likewise, global awareness of issues like human trafficking and the exploitation of immigrant domestic workers has increased attention to the gender makeup of migrants. But are women really more likely to migrate today than they were in earlier times? In *Gender and International Migration*, sociologist and demographer Katharine Donato and historian Donna Gabaccia evaluate the historical evidence to show that women have been a significant part of migration flows for centuries. The first scholarly analysis of gender and migration over the centuries, *Gender and International Migration* demonstrates that variation in the gender composition of migration reflect not only the movements of women relative to men, but larger shifts in immigration policies and gender relations in the changing global economy. While most research has focused on women migrants after 1960, Donato and Gabaccia begin their analysis with the fifteenth century, when European colonization and the transatlantic slave trade led to large-scale forced migration, including the transport of prisoners and indentured servants to the Americas and Australia from Africa and Europe. Contrary to the popular conception that most of these migrants were male, the authors show that a significant portion were women. The gender composition of migrants was driven by regional labor markets and local beliefs of the sending countries. For example, while coastal ports of western Africa traded mostly male slaves to Europeans, most slaves exiting east Africa for the Middle East were women due to this region's demand for female reproductive labor. Donato and Gabaccia show how the changing

immigration policies of receiving countries affect the gender composition of global migration. Nineteenth-century immigration restrictions based on race, such as the Chinese Exclusion Act in the United States, limited male labor migration. But as these policies were replaced by regulated migration based on categories such as employment and marriage, the balance of men and women became more equal – both in large immigrant-receiving nations such as the United States, Canada, and Israel, and in nations with small immigrant populations such as South Africa, the Philippines, and Argentina. The gender composition of today's migrants reflects a much stronger demand for female labor than in the past. The authors conclude that gender imbalance in migration is most likely to occur when coercive systems of labor recruitment exist, whether in the slave trade of the early modern era or in recent guest-worker programs. Using methods and insights from history, gender studies, demography, and other social sciences, *Gender and International Migration* shows that feminization is better characterized as a gradual and ongoing shift toward gender balance in migrant populations worldwide. This groundbreaking demographic and historical analysis provides an important foundation for future migration research.

**Ominous Transition** Joye Bowman 1997  
*Ominous Transition* is about the relationship between banditry and political power in the former Portuguese colony of Guinea (presently Guinea-Bissau). The book begins in the mid-nineteenth century, during what one might call the 'classical era' of political economy because of Great Britain's abolition of slavery and passage of the first factory legislation; it ends with the

1911 republican revolution in Portugal and the outbreak of the First World War three years later.

**Working-Class Heroes** Mat Callahan 2019-09-01  
*Working-Class Heroes* is an organic melding of history, music, and politics that demonstrates with remarkably colorful evidence that workers everywhere will struggle to improve their conditions of life. And among them will be workers who share an insight: in order to better our lot, we must act collectively to change the world. This profusely illustrated treasury of song sheets, lyrics, photographs, histories, and biographical sketches explores the notion that our best hope lies in the capacity of ordinary working people to awaken to the need to emancipate ourselves and all of humanity. Featuring over a dozen songwriters, from Joe Hill to Aunt Molly Jackson, *Working-Class Heroes* delivers a lyrical death blow to the falsehood that so-called political songs of the twentieth century were all written by intellectuals in New York. Many, like Ella May Wiggins, were murdered by the bosses. Others, like Sarah Ogan Gunning, watched their children starve to death and their husbands die of black lung, only to rise up singing against the system that caused so much misery. Most of the songs collected here are from the early twentieth century, yet their striking relevance to current affairs invites us to explore the historical conditions that inspired their creation: systemic crisis, advancing fascism, and the threat of world war. In the face of violent terror, these working-class songwriters bravely stood up to fight oppression. Such courage is immortal, and the songs of such heroes can still lift our spirits, if we sing them today. Featured in this twenty-song collection are Sarah Ogan Gunning,

Ralph Chaplin, Woody Guthrie, Ella May Wiggins, Joe Hill, Paul Robeson, John Handcox, Aunt Molly Jackson, Jim Garland, Alfred Hayes, Joseph Brandon, and several anonymous proletarian songwriters whose names have been long forgotten, though their words will never die.

**A Fistful of Shells** Toby Green  
2019-03-21 By the time the "Scramble for Africa" among European colonial powers began in the late nineteenth century, Africa had already been globally connected for centuries. Its gold had fueled the economies of Europe and the Islamic world for nearly a millennium, and the sophisticated kingdoms spanning its west coast had traded with Europeans since the fifteenth century. Until at least 1650, this was a trade of equals, using a variety of currencies—most importantly, cowrie shells imported from the Maldives and nzimbu shells imported from Brazil. But, as the slave trade grew, African kingdoms began to lose prominence in the growing global economy. We have been living with the effects of this shift ever since. With *A Fistful of Shells*, Toby Green transforms our view of West and West-Central Africa by reconstructing the world of these kingdoms, which revolved around trade, diplomacy, complex religious beliefs, and the production of art.

Green shows how the slave trade led to economic disparities that caused African kingdoms to lose relative political and economic power. The concentration of money in the hands of Atlantic elites in and outside these kingdoms brought about a revolutionary nineteenth century in Africa, parallel to the upheavals then taking place in Europe and America. Yet political fragmentation following the fall of African aristocracies produced radically different results as European colonization took hold. Drawing not just on written histories, but on archival research in nine countries, art, oral history, archaeology, and letters, Green lays bare the transformations that have shaped world politics and the global economy since the fifteenth century and paints a new and masterful portrait of West Africa, past and present.

West African Kingdoms in the Nineteenth Century Daryll Forde  
2018-10-10 Originally published in 1967 this volume presents studies of 10 West African kingdoms which have played an important part in the economic, political and cultural life of the region. Ranging geographically from the kingdom of Benin in southern Nigeria to the Wolof kingdom of Kayor in Senegal, they include the Oyo Yoruba, Dahomey, Hausa, Maradi, Kom in West Cameroon, the Mossi, Ashanti and Gonja and the Mende chiefdoms of Sierra Leone. Each outlines the historical origins and development of the kingdom and analyses its organization in the nineteenth century. It includes accounts of the economic basis and resources of the state and the significance of tribute and trade, of the social categories among its population, the administrative machinery and communications, the judicial and military organization and external

relations. It also considers the importance of the ideology and rituals of kingship.

*Changing Times* Ulla Fels 2017-04-04  
Changing Times: Considering the many African refugees seeking Asylum in our rich European countries nowadays and our lack of knowledge about their social background, Bakary Sidibe's stories about his life and his explanations about his Gambian society help us to feel more connected with the newcomers and to understand them as people with their own history and values. Bakary Sidibe also shows us how the destabilising influence of the colonial rulers on the traditional social, economic and political structures of African societies still affects the life of the people today. Their young men with no employment and no perspectives at home are now seeking their fortunes in Europe.
