Pricing and Risk Management of Synthetic CDOs Anna Schlösser 2011-02-04 This book considers the one-factor copula model for credit portfolios that are used for pricing synthetic CDO structures as well as for risk management and measurement applications involving the generation of scenarios for the complete universe of risk factors and the inclusion of CDO structures in a portfolio context. For this objective, it is especially important to have a computationally fast model that can also be used in a scenario simulation framework. The well known Gaussian copula model is extended in various ways in order to improve its drawbacks of correlation smile and time inconsistency. Also the application of the large homogeneous cell assumption, that allows to differentiate between rating classes, makes the model convenient and powerful for practical applications. The Crash-NIG extension introduces an important regime-switching feature allowing the possibility of a market crash that is characterized by a high-correlation regime.

Privacy Act Issuances ... Compilation United States. Office of the Federal Register 1976 Contains systems of records maintained on individuals by Federal agencies which were published in the Federal Register and rules of each agency concerning the procedures the agency will use in helping individuals who request information about their records.

Simester and Sullivan's Criminal Law J J Child 2022-09-15 '... undoubtedly a first-rate companion for any undergraduate or post-graduate law course.' John Taggart, Criminal Law Review This outstanding account of modern English criminal law combines detailed exposition and analysis of the law with a careful exploration of its theoretical underpinnings. Primarily, it is written for undergraduate students of criminal law, covering all subjects taught at undergraduate level. The book's philosophical approach ensures students have a deeper understanding of the law that goes beyond a purely doctrinal knowledge As a result, over its numerous editions, it has become required reading for many criminal law courses. The 8th edition covers all statutory law including the Assaults on Emergency Workers Act 2018 and Domestic Abuse Act, s 71. Case law discussions now cover: Grant (complicity); Barton (dishonesty); Broughton, Field, Kuddus, and Rebelo (homicide) and AG's Ref (No 1 of 2020) (sexual offences).

Implementation Guidance for 10 Cfr U.s. Nuclear Regulatory Comion 2014-05-20 The intent of this technical report is to provide guidance on, and to assist applicants and licensees in, the implementation of Title 10 of the Code of Federal Regulations (10 CFR) Part 37, "Physical Protection of Category 1 and Category 2 Quantities of Radioactive Material." This document describes methods that the U.S. Nuclear Regulatory Commission (NRC) finds acceptable for implementing the regulations.

Smith and Hogan's Text, Cases, and Materials on Criminal Law David Ormerod 2014-07-10 Smith and Hogan Criminal Law: Text and Materials is an essential, accessible guide to the criminal law. The eminently clear text that is the hallmark of the Smith & Hogan approach is supplemented by extracts from all of the key criminal law cases, together with other essential materials from statutes, reports, and articles. Introductory notes, commentary, summaries, and questions help students to contextualize the materials and to apply the law confidently, gaining an in-depth insight into the problems that the law poses and faces. The contents of the eleventh edition have been substantially revised and restructured to present the materials in an order that closely matches the structure of contemporary courses on criminal law. The overall approach that the book takes has been adjusted to include significantly more explanatory text, thus ensuring that the book is suitable for use as a core textbook. The latest legislation and all of the recent cases that continue to shape the law are included, providing the law student with everything they need to develop a thorough understanding of the key cases and the legal principles that they illustrate.

Long-term Trends in Ecosystem Health Garry J. Scrimgeour 1995 The goal of this report is to assess trends in benthic macroinvertebrate community structure in the Peace-Athabasca river system. The report describes a database compiled from such sources as the provincial environmental ministry and pulp and paper companies, reviews the quality of the data and the sampling methods and protocols used in collecting the macroinvertebrate community data, and presents results of multivariate statistical analyses and cluster analyses of the data. The results include the degree of temporal changes in macroinvertebrate communities upstream and downstream of point-source outfalls.

National Electrical Code National Fire Protection Association 2010 Safe, efficient, code-compliant electrical installations are made simple with the latest publication of this widely popular resource. Like its highly successful previous editions, the National Electrical Code 2011 spiral bound version combines solid, thorough, research-based content with the tools you need to build an in-depth understanding of the most important topics. New to the 2011 edition are articles including first-time Article 399 on Outdoor, Overhead Conductors with over 600 volts, first-time Article 694 on Small Wind Electric Systems, first-time Article 840 on Premises Powered Broadband Communications Systems, and more. This spiralbound version allows users to open the code to a certain page and easily keep the book open while referencing that page. The National Electrical Code is adopted in all 50 states, and is an essential reference for those in or entering careers in electrical design, installation, inspection, and safety.

Simester and Sullivan's Criminal Law A P Simester 2019-08-22 This is the new edition of the leading textbook on criminal law by Professors Simester and Sullivan, now co-written with Professors Spencer, Stark and Virgo. Simester and Sullivan's Criminal Law is an outstanding account of modern English criminal law, combining detailed exposition and analysis of the law with a careful exploration of its theoretical underpinnings. Primarily, it is written for undergraduate students of criminal law and it has become the set text in many leading universities. Additionally, the book is used as an important point of reference in academic writing and postgraduate research in England and abroad. Simester and Sullivan's Criminal Law has been cited by appellate courts throughout the world. Review of Previous Edition: '... undoubtedly a first-rate companion for any undergraduate or post-graduate law course. Since attaining international recognition and citation in appellate courts worldwide, the security of the text's position as a point of academic reference remains as steadfast as ever.' John Taggart, Criminal Law Review

The Roma Struggle for Compensation in Post-war Germany Julia Von dem Knesebeck 2011 Thirty years passed before it was accepted, in West Germany and elsewhere, that the Roma (Germany's Gypsies) had been Holocaust victims. And, similarly, it took thirty years for the West German state to admit that the sterilisation of Roma had been part of the 'Final Solution'. Drawing on a substantial body of previously unseen sources, this book examines the history of the struggle of Roma for recognition as racially persecuted victims of National Socialism in post-war Germany. Since modern academics belatedly began to take an interest in them, the Roma have been described as 'forgotten victims'. This book looks at the

period in West Germany between the end of the War and the beginning of the Roma civil rights movement in the early 1980s, during which the Roma were largely passed over when it came to compensation. The complex reasons for this are at the heart of this book.

Participation in EU Rule-making Joana Mendes 2011-04-07
The limited scope of participation in the making of EU law remains a continued source of controversy, featuring prominently in recent institutional and political developments that have been shaping the EU's constitutional framework - most intensely in the follow up of the Commission's White Paper on Governance. Yet little attention has been paid to participation rights as a means of ensuring the procedural protection of persons affected by EU regulation in its diverse forms. This is a dimension of the rule of law that has been largely ignored by EU legislative and judicial bodies. Not only the legislator, but also the Court of Justice and the Court of First Instance tend to adhere to excessively formal conceptions of participation rights that are premised on the right to be heard in individual procedures, as well as to a restrictive view regarding the relationships between the citizens and the administration. This book shows why, in the face of new regulatory developments, these conceptions are currently inadequate to ensure the legal protection of rights and interests affected by EU regulation. Combining a conceptual analysis with thorough empirical scrutiny, this book assesses the scope of participation rights in EU law against their rationales and underlying legal values. It makes a case for the extension of participation rights to new situations and new types of procedures, in particular those that would generally fall within the category of rulemaking. It brings distinct normative insights into a crucial theme of EU administrative law, and makes a topical and timely contribution to the increasingly notable theme of public participation in EU regulation. Joanna Mendes' 2009

thesis upon which Participation in EU Rule-Making is based was awarded the the European University Institute (Florence) Mauro Cappelletti Prize for the best doctoral thesis using a methodology of comparative law

Principles of Element Design Peter Rich 2012-10-02
The construction of buildings is learnt through experience and the inheritance of a tradition in forming buildings over several thousand years. Successful construction learns from this experience which becomes embodied in principles of application. Though materials and techniques change, various elements have to perform the same function. 'Principles of Element Design' identifies all the relevant elements and then breaks these elements down into all their basic constituents, making it possible for students to fully understand the given theory and principles behind each part. As all building projects are subject to guidance through the Building Regulations and British Standards, this book gives an immediate reference back to relevant information to help practitioners and contractors identify key documents needed. Yvonne Dean B.A. (Hons) B.A (Open) RIBA, an architect, energy consultant and materials technologist. She also has 15 years experience as a lecturer, travels widely and is a guest lecturer at many universities. She pioneered an access course for Women into Architecture and Building, which has been used as a template by others, and has been instrumental in helping to change the teaching of technology for architects and designers. Peter Rich AA Dipl. (Hons) Architect, started his career with 14 years experience as a qualified architectural technician. He then joined the AA School of Architecture, working with Bill Allen and John Bickerdike after his graduation, later becoming a partner of Bickerdike Allen Rich and Partners. He also taught building construction at the Bartlett School of Architecture, University College London, and architectural design at the Polytechnic of North London. He now acts as a Consultant.
