Child Migration in Africa Iman Hashim 2011-02-10 Child Migration in Africa explores the mobility of children without their parents within West Africa. Drawing on the experiences of children from rural Burkina Faso and Ghana, the book provides rich material on the circumstances of children's voluntary migration and their experiences of it. Their accounts challenge the normative ideals of what a 'good' childhood is, which often underlie public debates about children's migration, education and work in developing countries. The comparative study of Burkina Faso and Ghana highlights that social networks operate in ways that can be both enabling and constraining for young migrants, as can cultural views on age- and gender-appropriate behaviour. The book questions easily made assumptions regarding children's experiences when migrating independently of their parents and contributes to analytical and cross-cultural understandings of childhood. Part of the groundbreaking Africa Now series, Child Migration in Africa is an important and timely contribution to an under-researched area.

Growing Apart Peter Lewis 2009-12-11 "Growing Apart is an important and distinguished contribution to the literature on the political economy of development. Indonesia and Nigeria have long presented one of the most natural opportunities for comparative study. Peter Lewis, one of America's best scholars of Nigeria, has produced the definitive treatment of their divergent development paths. In the process, he tells us much theoretically about when, why, and how political institutions shape economic growth." —Larry Diamond, Senior Fellow, Hoover Institution "Growing Apart is a careful and sophisticated analysis of the political factors that have shaped the economic fortunes of Indonesia and Nigeria. Both scholars and policymakers will benefit from this book's valuable insights." —Michael L. Ross, Associate Professor of Political Science, Chair of International Development Studies, UCLA "Lewis presents an extraordinarily well-documented comparative case study of two countries with a great deal in common, and yet with remarkably different postcolonial histories. His approach is a welcome departure from currently fashionable attempts to explain development using large, multi-country databases packed with often dubious measures of various aspects of 'governance.'" —Ross H. McLeod, Editor, Bulletin of Indonesian Economic Studies "This is a highly readable and important book. Peter Lewis provides us with both a compelling institutionalist analysis of economic development performance and a very insightful comparative account of the political economies of two highly complex developing countries, Nigeria and Indonesia. His well-informed account generates interesting findings by focusing on the ability of leaders in both countries to make credible commitments to the private sector and assemble pro-growth coalitions. This kind of cross-regional political economy is often advocated in the profession but actually quite rare because it is so hard to do well. Lewis's book will set the standard for a long time." —Nicolas van de Walle, John S. Knight Professor of International Studies, Cornell University Peter M. Lewis is Associate Professor and Director of the African Studies Program, Johns Hopkins University, School of Advanced International Studies.

Policy Networks Under Pressure Carsten Daugbjerg 2018-11-09 First published in 1998, this book examines how established policy networks and the broader context within which they are embedded influence the choice of policy when change has been put on the agenda. It criticises the existing network literature for being predominantly descriptive, for having little to say on the choice of policy and for omitting the analysis of the broader political structures which have consequences for meso-level policy making. In order to reinforce the explanatory power of policy network analysis, the book develops both a meso and a macro-level theoretical model. They help to explain why policy change is more radical in some settings than in others. The theoretical arguments are tested by the use of detailed comparisons of agri-environmental policy making in Denmark and Sweden and of agricultural policy reforms in the European Union and Sweden.

By Night the Mountain Burns Juan Tomás Ávila Laurel 2014 By Night the Mountain Burns recounts the narrator's childhood on a remote island off the West African coast, living with his mysterious grandfather, several mothers and no fathers. We learn of a dark chapter in the island's history: a bush fire destroys the crops, then hundreds perish in a cholera outbreak. Superstition dominates, and the islanders must sacrifice their possessions to the enraged ocean god. What of their lives will they manage to save? Whitmanesque in its lyrical evocation of the island, Ávila Laurel's writing builds quietly, through the oral rhythms of traditional storytelling, into gripping drama worthy of an Achebe or a García Márquez.

Displacement Economies in Africa Amanda Hammar 2014-05-08 Large-scale displacement - whether caused by war, state-related political or development projects, different forms of political violence, structural crisis, or even natural disasters - evokes many stereotyped assumptions about those forcibly displaced or emplaced. At the same time there is a problematic lack of attention paid to the diversity of actors, strategies and practices that reshape the world in the face (and chronic aftermath) of dramatic moments of violent dislocation. In this highly original volume, based on empirical case studies from across sub-Saharan Africa, the authors reveal the paradoxical effects, both intended and unexpected, that displacement produces, and that manifest themselves in displacement economies. An important contribution to a topic of growing scholarly and policy interest.

Zimbabwe's Fast Track Land Reform Prosper B. Matondi 2012-11-08 The Fast Track Land Reform Programme in Zimbabwe has emerged as a highly contested reform process both nationally and internationally. The image of it has all too often been that of the widespread displacement and subsequent replacement of various people, agricultural-related production systems, facets and processes. The reality, however, is altogether more complex. Providing new and much-needed empirical research, this in-depth book examines how processes such as land acquisition, allocation, transitional production outcomes, social life, gender and tenure, have influenced and been influenced by the forces driving the programme. It also explores the ways in which the land reform programme has created a new agrarian structure based on small- to medium-scale farmers. In attempting to resolve the problematic issues the reforms have raised, the author argues that it is this new agrarian formation which provides the greatest scope for improving Zimbabwe's agriculture and development. Based on a broader geographical scope than any previous study carried out on the subject, this is a landmark work on a subject of considerable controversy.

Noise Uprising Michael Denning 2015-09-15 A radically new reading of the origins of recorded music *Noise Uprising* brings to life the moment and sounds of a cultural revolution. Between the development of electrical recording in 1925 and the outset of the Great Depression in the early 1930s, the soundscape of modern times unfolded in a series of obscure recording sessions, as hundreds of unknown musicians entered makeshift studios to record the melodies and rhythms of urban streets and dancehalls. The musical styles and idioms etched onto shellac disks reverberated around the globe: among them Havana's son, Rio's samba, New Orleans' jazz, Buenos Aires' tango, Seville's flamenco, Cairo's tarab, Johannesburg's marabi, Jakarta's kroncong, and Honolulu's hula. They triggered the first great battle over popular music and became the soundtrack to decolonization.

Balancing Individualism and Collectivism Janet McIntyre-Mills 2017-10-03 This book addresses the social and environmental justice challenge to live sustainably and well. It considers the consequences of our social, economic and environmental policy and governance decisions for this generation and the next. The book tests out ways to improve representation, accountability and re-generation. It addresses the need to take into account the ethical implications of policy and governance decisions in the short, medium and long term based on testing out the implications for self, other and the environment. This book recognizes the negative impact that humans have had on the Earth's ecosystem and recommends a less anthropocentric way of looking at policies and governance. The chapters discuss the geologic impact that people have had on the globe, both positive and negative, and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era. Based on these observations, the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience, and to conduct an egalitarian lifestyle. These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority, the growth in unsustainable food choices and of displaced people, and the need for a new sense of relationship with nature and other animals, among other issues. The chapters included in *Balancing Individualism and Collectivism: Social and Environmental Justice* encourage readers to challenge the sustainability agenda of the anthropocentric life. Proposed solutions to these unsustainable actions include structuralized interventions and volunteerism through encouragement and education, with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance.

Nigeria John Campbell 2013-06-06 Nigeria, the United States' most important strategic partner in West Africa, is in grave trouble. While Nigerians often claim they are masters of dancing on the brink without falling off, the disastrous administration of President Goodluck Jonathan, the radical Islamic insurrection Boko Haram, and escalating violence in the delta and the north may finally provide the impetus that pushes it into the abyss of state failure. In this thoroughly updated edition, John Campbell explores Nigeria's post-colonial history and presents a nuanced explanation of the events and conditions that have carried this complex, dynamic, and very troubled giant to the edge. Central to his analysis are the oil wealth, endemic corruption, and elite competition that have undermined Nigeria's nascent democratic institutions and alienated an increasingly impoverished population. However, state failure is not inevitable, nor is it in the interest of the United States. Campbell provides concrete new policy options that would not only allow the United States to help Nigeria avoid state failure but also to play a positive role in Nigeria's political, social, and economic development.

Obi's Nightmare Tenso Tenso 2018-06-18 Obi is the world's longest serving dictator, Equatorial Guinea's President Teodoro Obiang Nguema Mbasogo. *Obi's Nightmare* is just that, a comic about Obi's worst day ever. What would be the worst possible thing that could happen to Obi? Would it be for his heir apparent son's \$50 million collection of supercars to be seized by French authorities? What if the country's vast oil reserves were to dry up, or what if he was forced to share power? Would it be the results of a truly democratic election, or the worsening of his already fragile health? No, answer the pseudonymous authors of the first ever Equatoguinean graphic novel. The worst possible thing that could happen to President Obiang would be to

endure the life of an average Guinean citizen. Welcome to Obi's Nightmare, the riches-to-rags tale of Obiang's living out a single ordinary day as an ordinary Guinean, in a country ravaged by poverty and squalid living conditions for all but a very select few of Obi's former associates, despite boasting the continent's highest GDP. This no-hold-barred comic dares its readers to laugh at the man who has declared himself above both international law and common decency, by taking a comical but critical look at the everyday life of the average Guinean. Working together with EG Justice, Phoneme produced the Spanish-language original version of La Pesadilla de Obi, which has been smuggled into Equatorial Guinea to challenge the dictatorship and promote democracy.

Informality and Gender Gaps Going Hand in Hand Vivian Malta 2019-05-23 In sub-Saharan Africa women work relatively more in the informal sector than men. Many factors could explain this difference, including women's lower education levels, legal barriers, social norms and demographic characteristics. Cross-country comparisons indicate strong associations between gender gaps and higher female informality. This paper uses microdata from Senegal to assess the probability of a worker being informal, and our main findings are: (i) in urban areas, being a woman increases this probability by 8.5 percent; (ii) education is usually more relevant for women; (iii) having kids reduces men's probability of being informal but increases women's.

African Conflicts and Informal Power Mats Utas 2012-03-08 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and politics are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

Africa's Return Migrants Lisa Åkesson 2015-07-15 Many African migrants residing abroad nurture a hope to one day return, at least temporarily, to their home country. In the wake of economic crises in the developed world, alongside rapid economic growth in parts of Africa, the impetus to 'return' is likely to increase. Such returnees are often portrayed as agents of development, bringing with them capital, knowledge and skills as well as connections and experience gained abroad. Yet, the reality is altogether more complex. In this much-needed volume, based on extensive original fieldwork, the authors reveal that there is all too often a gaping divide between abstract policy assumptions and migrants' actual practices. In contrast to the prevailing optimism of policies on migration and development, Africa's Return Migrants demonstrates that the capital obtained abroad is not always advantageous and that it can even hamper successful entrepreneurship and other forms of economic, political and social engagement.

Africa's World Trade Margaret C. Lee 2014-10-09 Are Africa's world markets really contributing to development across the continent for individuals, nations and regions? This is the key question posed by Margaret Lee in this provocative book, in which she argues that all too often the voices of African traders are obscured amid a blizzard of statistical analysis. However,

it is these very voices - from those operating on the ground as formal or informal traders - that must be listened to in order to form a true understanding of the impact trade regimes have on these individuals and their communities. Featuring a wealth of oral histories from across sub-Saharan Africa and beyond, including Africans in China, Africa's World Trade offers a unique insight into how the complexity of international trade agreements can shape the everyday lives of ordinary Africans.

The Rise of China and India in Africa Fantu Cheru 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

Oil and Insurgency in the Niger Delta Cyril Obi 2011-02-10 The recent escalation in the violent conflict in the Niger Delta has brought the region to the forefront of international energy and security concerns. This book analyses the causes, dynamics and politics underpinning oil-related violence in the Niger Delta region of Nigeria. It focuses on the drivers of the conflict, as well as the ways the crises spawned by the political economy of oil and contradictions within Nigeria's ethnic politics have contributed to the morphing of initially poorly coordinated, largely non-violent protests into a pan-Delta insurgency. Approaching the issue from a number of perspectives, the book offers the most up-to-date and comprehensive analysis available of the varied dimensions of the conflict. Combining empirically-based and analytic chapters, it attempts to explain the causes of the escalation in violence, the various actors, levels and dynamics involved, and the policy challenges faced with regard to conflict management/resolution and the options for peace. It also examines the role of oil as a commodity of global strategic significance, addressing the relationship between oil, energy security and development in the Niger Delta.

Africa's Informal Workers Ilda Lindell 2013-04-04 Africa's Informal Workers is a vigorous examination of the informalization and casualization of work, which is changing livelihoods in Africa and beyond. Gathering cases from nine countries and cities across sub-Saharan Africa, and from a range of sectors, this volume goes beyond the usual focus on household 'coping strategies' and individual agency, addressing the growing number of collective organizations through which informal workers make themselves visible and articulate their demands and interests. The emerging picture is that of a highly diverse landscape of organized actors, providing grounds for tension but also opportunities for alliance. The collection examines attempts at organizing across the formal-informal work spheres, and explores the novel trend of transnational organizing by informal workers. Part of the ground-breaking Africa Now series, Africa's Informal Workers is a timely exploration of deep, ongoing economic, political and social transformations.

Taken as a whole, this volume makes a superb introduction to African literature and to the work of one of its leading interpreters.

Women and the Informal Economy in Urban Africa Mary Njeri Kinyanjui 2014-06-12 In this highly original work, Mary Njeri Kinyanjui explores the trajectory of women's movement from

the margins of urbanization into the centres of business activities in Nairobi and its accompanying implications for urban planning. While women in much of Africa have struggled to gain urban citizenship and continue to be weighed down by poor education, low income and confinement to domestic responsibilities due to patriarchic norms, a new form of urban dynamism - partly informed by the informal economy - is now enabling them to manage poverty, create jobs and link to the circuits of capital and labour. Relying on social ties, reciprocity, sharing and collaboration, women's informal 'solidarity entrepreneurialism' is taking them away from the margins of business activity and catapulting them into the centre. Bringing together

key issues of gender, economic informality and urban planning in Africa, Kinyanjui demonstrates that women have become a critical factor in the making of a postcolonial city.
